

Date: April 21, 2016 Time: 10:18

This is KE7ZIW in Monroe initiating a Net for the Utah State Shakeout/Earthquake Drill.

Please stand by your radios and listen for instructions from Net control. *OR EOC LOCATIONS-*

1st, Does anyone have a Life Threatening issue that needs communication assistance at this time?

When that need arises, ~~assert~~ ^{INSERT} yourself into this net by saying your call sign and announcing "Emergency" or "some indication of Emergency Traffic" between existing conversations. This also suggests to all operators to try and leave a space between conversations to allow this feature to function effectively.

Do we have an EOC on line with us from Dispatch? You will be EOC Alpha.
Do you have any traffic, instructions or communication priorities at this time?

*TACTICAL
CALL
SIGNS*

Do we have any other EOC stations on line? You will be EOC Beta. Charlie Delta, etc..
Do you have any traffic, instructions or communication priorities at this time?

Our priorities at this time will be to establish which operators are available:

- Call sign and time
- where you are located and
- if you are mobile, base or handheld.
- Your conditions, damage, important information for the community
- Notes and remarks.

Beyond this, we will exercise our ability to move to a simplex frequency.
Because 146.520 is a National Call Channel and used to access an active repeater to support I-15 Freeway traffic, we will use:

146.540 – note checkins on each and return to 146.640 when complete.

146.560

146.580
